Is this a "Fast & Focused" Search Request? (Circle One) YES NO
A "Fast & Focused" Search is completed in 2-3 hours (maximum). The search must be on a very specific topic and meet certain criteria. The criteria are posted in EIC3600 and on the EIC3600 NPL Web Page at <http://ptoweb/patents/stic/stic-ic3600.htm>.

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to describe the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

Voluntary Results Feedback Form

➤ I am an examiner in Workgroup: Example: 3620 (optional)

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

CAMBRIDGE, Mass.

Zentropy Partners, a Cambridge, Mass., digital consulting and development
company has designed Fleet **Credit Card** Services' recently launched
Web site .

The site, cards.fleet.com, features a menu of interactive components
designed to help cardholders manage their online accounts.

Customers can use the site to review past statements, set **transaction**
level alerts, request credit line increases, and read financial primers,
such as a short history...

Cardholders can also reach other services through the **site** , such as price
comparisons and **merchant** ratings.

Fleet said it hired Zentropy because of its digital design expertise and
its accommodation...

(Credit card issuers to prepare to battle alternative payment providers
who are offering consumers a bankless or cardless way to pay)

ABSTRACT:
Although Internet **payment** share for offline debit and credit cards is

about 95%, Robert Selander, CEO of MasterCard Intl, has called for credit card issuers to prepare to battle alternative **payment** providers who are offering consumers a bankless or cardless way to pay. Some businesses are offering non-credit card **payment** systems. Robert Levitan, CEO of Flooz.com, has created an online currency called Flooz. According...

...1999, consumers chose credit cards just 65% of the time when asked what kind of **payment** they preferred online. The survey also predicted that credit cards, with a 95% **payment** share in 1998, would only command 80% of online **payments** by 2003. Bank One Corp is offering the eMoneyMail person-to-person **payment** service, while eBay Inc and Wells Fargo Co are offering Billpoint to eBay buyers and sellers. Qpass, an online **payment** service, processes small **transactions** that the associations cannot handle economically. Qpass is considered an online purchase aggregator for \$2...

...their ISP charge added to their phone bill. This bypasses credit cards completely. Other alternative **payment** vehicles are discussed.

...

TEXT:

By Lavonne Kuykendall

Internet **payment** share for credit and offline debit cards stands at around 95%, but MasterCard International CEO...

...call on credit card issuers to circle the wagons against a coming onslaught of alternative **payment** providers out to offer Web surfers a cardless or even bankless way to pay.

Speaking...

...to a "huge number of people surfing the Internet who don't qualify for traditional **payment** cards." He warned of "a whole group of third parties trying to figure out ways..."

Apparently, Internet **payment** contenders have finally gotten some attention from mainline credit providers. For a long time, it...

...Discover Financial Services Inc., were willing to rest on their laurels when it came to **payment** share online. Selander called e-commerce **payments** a "birthright" for card issuers, but cautioned that "it is a business that is ours..."

...omitted

Credit card issuers' online marketing looks impressive -- at first. Besides nearly total control of **payments** on the Internet, issuers have guaranteed a strong marketing presence online by cobranding with major...

...a card, or pay for merchandise with a check. Though the first trickle of online **payment** alternatives is coming to market, many besides Selander say banks are too slow to offer...

...of speed has encouraged some to envision capturing part of that purchase share for alternative **payment** vehicles. The visionaries at those companies tend to take a longer view of **payments** than the three-to-four year existence of **retail** Web **sites** when stating their case for alternatives to cards.

Virtual cash

"Think of the history of..."

Cards Not the Only Game in Online Payment

ABSTRACT:

...on a card. eCharge Inc, a start-up based in Seattle, offers a non-card **payment** plan on the Internet. It now plans to debut a cardless Internet purchasing account. According...

...associations respond

Meanwhile, the associations say they are preparing new products to fill the Internet **payment** gap. James O. DeGracia, senior vice president of eVisa, the Visa U.S.A. electronic...

...division, says Visa will use its position of strength on the Internet to introduce new **payment** methods itself, in effect stopping competitors before they have a chance to develop a customer...

...Visa's new products, most planned for launch within the next several months, are micropayment **transactions** and a means for aggregating small **transactions** to allow merchants to reduce the discount fees they pay

There is also the partner...

...DeGracia, "will be developed according to priority and profitability (to member issuers)."

Person-to-person **payments**, such as those that occur between private parties on Internet auction sites, have top priority at eVisa, says DeGracia. eVisa may be onto a market opportunity that the other **payment** providers have missed. According to the National **Retail** Federation survey, online auction **sites** are among the top grossing Internet sites.

Upstarts in the Online **Payments** Game

With estimates for Internet spending rising into the tens of billions of dollars, it's small wonder that electronic **payment** developers are taking aim at a market dominated almost completely by credit cards. It has...

...is a snapshot of past and present upstarts aiming for a piece of the e-**payment** pie. Some work in conjunction with existing credit card-based systems.

CyberCash Inc. started out...

...in November 1998.

Qpass Inc., based in Seattle, was founded in 1997 to provide a **transaction** service for buyers and sellers of digital content and information on the Web. It operates...

...card to add value to an account that can be used only at teen-friendly **Web sites** and stores. **Credit card companies** still capture the discount rate on Cybermoola **transactions**, but lose the information on each purchase. Initially available over the Internet in various denominations, with **payment** accepted by credit card or check, Cybermoola promises to offer its cards at member stores...

...longer than those of some digital-cash services, doesn't include any of the top **retailer Web sites**, like Amazon.cm or eToys.com.

ICanBuy.com Inc.'s Web site, Icanbuy.com, is...

Revenue Recognition in the Dot-Com Era

(This discussion of the Securities & Exchange Commission's Staff Accounting Bulletin (SAB) No 101, regarding Revenue Recognition in Financial Statements, discusses how retailers can account on their financial statements, for layaway and other plans in which the sale may have commitments but may not be completed)

...

TEXT:

By Frank Cerne

The technology to facilitated secure card **payments** on the Internet is advancing rapidly. But plenty of hurdles remains to be overcome.

In...

...commerce.

Software Requirements

That's because consumers, merchants, and the acquiring banks that process card **transactions** for merchants all must use software developed by the same company for an Internet **transaction** to be successful. For example, if a consumer uses CyberCash Inc.'s so-called wallet...

...card information to an Internet merchant, the merchant must have CyberCash's CashRegister, which accepts **payments** made with the CyberCash wallet. In turn, the merchant's acquiring bank must use CyberCash software to process the **transaction**. Throw in another vendor's software, and the **transaction** goes nowhere.

Yet despite such restrictions, Internet commerce is beginning to show signs of potential. The number of **merchants** that have set up **sites** on the World Wide Web, the Internet's hub of electronic commerce, has surpassed 5,000, though only a small percentage accept on-line **payments**.

Sales Hitting \$518 Million

The estimated value of such **transactions** varies widely, but a recent report by Forrester Research Group Inc., Cambridge, Mass., estimates that
...

...will be made using credit cards, and cards will continue to be dominant method of **payment** in the future. Forrester estimates that Internet sales will more than double next year, to...

...The survey of 500 Internet shoppers also found that credit cards are the method of **payment** for 80% of on-line purchases. Furthermore, when given a choice of **payment** methods for Internet purchases, 35% of consumers prefer credit cards as their first choice.

Such...

...operate together, and that consumers and merchants will develop trust in the validity of Internet **transactions**.

The fact that technology companies are replicating parts of the conventional credit card **transaction** process -- from authorization to draft capture and settlement -- and applying them to the Internet world...
...commerce will be smooth. "We believe that enabling financial

Michigan National Bank. Netscape will integrate CyberCoin into its LivePayment software for merchants. Cybercash...

...wallet service, banks will have the ability to not only brand the wallet but the **payment** products within the wallet. "The growth is going to come in the form of branded direct digital access for demand-deposit accounts," says Crone. "This method of **payment** is a way for banks to assume control of **payments** system, because the **payment** will come from banks, not card associations or software providers." But some observers question how...

...electronic cash products will be with consumers. "Banks should focus on credit cards because the **payments** infrastructure between consumers, merchants, and banks is already in place," says Forrester analyst Weisman.

Other vendors have developed **payment** products that do not encrypt credit card information but use other methods for securing Internet **payments**. San Diego-based First Virtual Holdings Inc. has designed a credit card **payment** system in which a cardholder receives an eight-character so-called VirtualPIN that is tied...

...verification.

The customer then has one of three option -- "yes," which signifies it is valid **transaction**, "no," which indicates the customer does not want to purchase the merchandise, and "fraud," which signals that the customer did not place the order to begin with and that the **transaction** is fraudulent. In that case, the customer can cancel the **transaction** before it takes place.

Barriers to Fraud

"There are a lot of things that have...

...large scale is very difficult."

First Virtual is now offering merchants the ability to receive **payments** at their e-mail addresses within three to five days. Previously, merchants had to agree to wait 90 days for **payment** to ensure that the purchase were made with legitimate credit cards. First Virtual's Express...

...is \$10 a year and 2% of the sale, plus a 29-cent charge per **transaction**

First Virtual has signed up 179,000 consumers and 2,600 merchants. Recently, the company received a \$12.5 million capital infusion from First Data, First USA **Paymentech**, and GE Capital Corp. As part of the agreement, the four parties are negotiating a marketing deal in which First Data, First USA **Paymentech**, and GE Capital would deploy First Virtual's technology and would give First Virtual access...

CYBERCASH AND THE NATIONAL BANK OF CANADA TEAM TO DELIVER INTERNET PAYMENT SOLUTION

... CITY, Calif., June 4 /PRNewswire/ -- CyberCash, Inc. (Nasdaq: CYCH), a leading developer of secure Internet **payment** solutions, and the National Bank of Canada, today announced the first available secure Internet **payment** service in Canada. In a partnership announced today, the National Bank of Canada will offer CyberCash secure credit card **payment** services(TM) to their merchants and the CyberCash Wallet(TM) to consumers.

"The National Bank has always been out in front when it comes to electronic **payment** services," explained Charlotte Sauve, Director, Consumer Electronic **Payments**, National Bank of Canada. "The CyberCash

solution will enable us to give merchants and consumers...
...will offer Canadian businesses a complete and real-time merchant system for secure, high-volume **transactions** over the Internet with CyberCash's Merchant CashRegister(TM). Consumers can buy products and goods over the Internet by downloading the browser-independent CyberCash Wallet from the **merchant site** or the CyberCash **site**.

"CyberCash is committed to making its secure Internet **payment** services ubiquitous for Internet commerce and that includes the global market," said Magdalena Yesil, co...

...partner, the National Bank of Canada will extend CyberCash globally while offering a safe online **payment** solution to the Canadian marketplace."

CyberCash will support the recently proposed standard for Secure Electronic **Transaction** (SET) over the Internet, announced by VISA and MasterCard. When SET is established, CyberCash is committed to being one of the first SET-compliant Internet **payment** services available.

Using CyberCash

The CyberCash Wallet gives consumers the instantaneous ability to pay for...

...free software program that is installed on a consumer's personal computer and allows CyberCash **transactions** to move between a merchant's server and the bank **transaction** server system. The CyberCash Wallet has the graphical look and feel of a real wallet...

...credit cards including Visa, MasterCard, Discover and American Express.

The CyberCash CashRegister, a secure merchant **payment** service, provides software integration modules in a server platform which accepts **payments** made with the CyberCash Wallet over the Internet and receives the information necessary to process a credit card **transaction**. The CyberCash system is designed to build upon and be compatible with existing financial institution infrastructure, and allows CyberCash merchants to process **transactions** with credit card processors.

About the National Bank

With assets of CDN \$50 billion, the...

...in August 1994, is a leading developer of software and service solutions for secure financial **transactions** over the Internet. The CyberCash system is designed to allow most banks to offer secure Internet **payments** to their merchants. CyberCash works with virtually all credit card processing institutions, enabling **payments** by credit card, electronic check and electronic coin to be instantaneously processed. CyberCash has established

...of charge and the consumer software, called the CyberCash Wallet, can be downloaded from the **company's Web site** at www.cybercash.com. The **company's** initial service, which handles **payments** using most major **credit cards**, was introduced in April 1995. Electronic check and coin services are expected to be released...
